|--|---|--|
| Crisis Information | Settlements | Hydrology |
| ■ Flooded Area (02/04/2015 16:23 UTC) | ○ Populated Place | — River |
| ■ Old Flooded Area (29/04/2015 16:24 UTC) | ○ Residential | — Canal |
| □ Area of Interest | ○ Cemetery | — Ditch |
| | □ Industrial | ■ River |
| | | □ Land Subject to Inundation |
| | | Transportation |
| | | — Secondary Road |
| | | — Local Road |

Consequences within the AOI on 02/04/2015

	ha	Affected	Total in AOI
Flooded area			209
Estimated population	Inhabitants	0	6352
Settlements	Cemetery	ha	0
	Industrial	ha	0
	Agricultural	ha	2.5
	Residential	ha	1.9
Transportation	Motorways	km	0
	Local roads	km	37
		1.05	167

Map Information

Due to heavy rainfall during last month, extensive damages have been reported in infrastructures and networks along the Strymonas river, in Central Macedonia. Many embankments have been broken, especially in the southern part of the river, flooding the road and rural network, while many hectares of agricultural land have been completely inundated. The affected areas were declared in the state of emergency. The core users of the maps are Disaster Response Authorities involved in the operations.

Data Sources
 Radarsat-2 © MDA (acquired on 02/04/2015 16:23 UTC, GSD 8 m) Ltd. All rights reserved.
 Sentinel-1A (acquired on 29/03/2015 16:24 UTC, GSD 10 m) provided by the European Space Agency.
 ESRI World Imagery © ESRI DigitalGlobe (acquired on 16/08/2010, GSD 2.5 m, cloud coverage 1%)
 Base vector layers based on OpenStreetMap © OpenStreetMap contributors, Wikimapia.org, GeoNames (approx. 1:10000, extracted on 01/01/2001), refined by GAF AG. Source information is included in vector data.
 Elevation data: SRTM (90 m posting). Height in meters above mean sea level.
 Population data: Landscan 2010 © UT BATTELLE, LLC.
 All Data sources are complete and with no gaps.
 Inset maps based on: Administrative boundaries (JRC, 2013, GISCO 2010, © EuroGeographics), Hydrology, Transportation (Natural Earth, 2012, CCM River DB © EU-JRC 2007), Settlements (Geonames, 2013).

Dissemination/Publication
 Delivery formats are GeoTIFF, GeoPDF, GeoJPEG and vectors (shapefile and KML formats).
 Map products available in the Copernicus EMS Portal at the following URL:
<http://emergency.copernicus.eu/mapping/list-of-components/EMSR122>
 All products are © of the European Union.

Disclaimer
 The products elaborated in the framework of current mapping in rush mode activation are realized to the best of our ability, within a very short time frame during a crisis, optimising the available data and information. All geographic information has limitations due to scale, resolution, date and interpretation of the original data sources. The products are compliant with Copernicus EMS Rapid Mapping Product Portfolio specifications.

Map Production
 The present map shows basic topographic features such as transportation, hydrology, settlements, industry and utilities in the area of Baltotopi (GREECE). The layer 'Land subject to inundation' includes areas such as riverbed, river meadow and marsh. These basic topographic features are derived from public datasets, refined by means of visual interpretation of post-event Sentinel-1A images.
 All satellite images have been radiometrically enhanced, orthorectified with RPC approach (using SRTM elevation data) and coregistered to the pre-event image.
 The estimated geometric accuracy of this product is 5 m CE90 or better, from native positional accuracy of the background satellite image.
 The estimated thematic accuracy of this product is 85% or better, as it is based on visual interpretation of recognizable items on very high resolution optical imagery. Shadowed areas are zones of lower interpretation accuracy due to the poorer image radiometry.
 Only the area enclosed by the Area of Interest has been analyzed.
